

ORB WEAVER FEATURES AND FUNCTIONS INCLUDES ALL SCANS AND DATA

Jul 25, 2026

1. Domain scan
2. Subdomain discovery
3. Sitemap discovery
4. Sitemap parsing
5. Robots.txt scan
6. Route discovery
7. Page crawl
8. Internal-link crawl
9. External-link inventory
10. Redirect detection
11. Broken-link detection
12. HTTP status collection
13. Canonical URL collection
14. Page-title collection
15. Meta-description collection
16. Heading collection
17. Section-heading collection
18. Page-text extraction
19. Content-block extraction
20. Page-purpose classification
21. Page-type classification
22. Navigation-menu discovery
23. Header navigation mapping
24. Footer navigation mapping
25. Breadcrumb mapping
26. Sidebar navigation mapping
27. Button discovery
28. Link discovery
29. CTA discovery
30. Form discovery
31. Form-field discovery
32. Input discovery
33. Select-menu discovery
34. Checkbox discovery
35. Radio-button discovery
36. Text-area discovery
37. Submit-control discovery
38. Search-control discovery

39. Modal discovery
40. Dialog discovery
41. Accordion discovery
42. Tab-interface discovery
43. Dropdown discovery
44. Menu-control discovery
45. Carousel-control discovery
46. Pagination-control discovery
47. Login-control discovery
48. Signup-control discovery
49. Account-control discovery
50. Cart-control discovery
51. Checkout-control discovery
52. Contact-control discovery
53. Download-control discovery
54. Media-control discovery
55. Element-ID collection
56. DOM-anchor collection
57. ARIA-label collection
58. Accessible-name collection
59. Visible-label collection
60. Data-attribute collection
61. Element-role collection
62. Element-type collection
63. Element-state collection
64. Disabled-state detection
65. Hidden-state detection
66. Visibility detection
67. Interactive-state detection
68. Element bounding-box collection
69. Element screen-position collection
70. Pointer-target extraction
71. Pointer-anchor generation
72. Pointer-manifest generation
73. Pointer plot-map generation
74. Pointer-target alias generation
75. Target-to-route mapping
76. Target-to-section mapping
77. Target-to-control mapping
78. Scroll-target mapping
79. Viewport-target mapping
80. Fixed-element detection
81. Sticky-element detection
82. Overlay detection

83. Z-order relationship detection
84. Mobile-layout scanning
85. Desktop-layout scanning
86. Responsive-layout comparison
87. Breakpoint behavior collection
88. Product-page discovery
89. Product-name collection
90. Product-description collection
91. Product-feature collection
92. Pricing-data collection
93. Service-page discovery
94. Service-description collection
95. FAQ discovery
96. FAQ question collection
97. FAQ answer collection
98. Contact-information collection
99. Business-information collection
100. Location-information collection
101. Hours-information collection
102. Policy-page discovery
103. Terms-page discovery
104. Privacy-page discovery
105. Legal-page discovery
106. Documentation discovery
107. Downloadable-file discovery
108. PDF discovery
109. Document metadata collection
110. Image discovery
111. Image-alt-text collection
112. Video discovery
113. Audio discovery
114. Media metadata collection
115. Logo discovery
116. Brand-asset discovery
117. Brand-name collection
118. Color-system collection
119. Typography-system collection
120. Structured-data discovery
121. JSON-LD collection
122. Schema.org data collection
123. Open Graph metadata collection
124. Social-link discovery
125. Search-engine metadata collection
126. Site-search discovery

127. Site-search behavior mapping
128. Application-route discovery
129. API-route inventory
130. Public endpoint mapping
131. Capability endpoint discovery
132. Authentication-flow mapping
133. Signup-flow mapping
134. Login-flow mapping
135. Contact-flow mapping
136. Purchase-flow mapping
137. Cart-flow mapping
138. Checkout-flow mapping
139. Lead-generation-flow mapping
140. Form-workflow mapping
141. Multi-step workflow mapping
142. Workflow-state collection
143. Required-field detection
144. Validation-rule detection
145. Error-message collection
146. Success-message collection
147. Confirmation-state collection
148. Navigation-action mapping
149. Click-action mapping
150. Scroll-action mapping
151. Form-action mapping
152. Route-transition mapping
153. Action-result mapping
154. Verification-point mapping
155. Recovery-path mapping
156. Page-to-page relationship mapping
157. Product-to-page relationship mapping
158. Service-to-page relationship mapping
159. FAQ-to-page relationship mapping
160. Control-to-workflow relationship mapping
161. Site knowledge graph construction
162. Site World compilation
163. Route capsule generation
164. Page capsule generation
165. Section capsule generation
166. Control capsule generation
167. Product capsule generation
168. Service capsule generation
169. Workflow capsule generation
170. Site terminology collection

171. Synonym collection
172. Alias collection
173. Visitor-language alias mapping
174. Intent-to-page mapping
175. Intent-to-section mapping
176. Intent-to-control mapping
177. Intent-to-workflow mapping
178. Capability mapping
179. Tool-to-capability mapping
180. Capability-to-route mapping
181. Capability-to-control mapping
182. Allowed-action mapping
183. Stage mapping
184. Stage-transition mapping
185. Stage Governor input generation
186. ORB configuration generation
187. Site-specific ORB knowledge generation
188. Site-specific ORB tool configuration
189. Site-specific ORB pointer configuration
190. Site-specific ORB navigation configuration
191. Site-specific ORB workflow configuration
192. Site-specific ORB articulation context
193. Site-specific ORB capability snapshot
194. Crawl-report generation
195. Endpoint-map generation
196. Pointer audit generation
197. Route audit generation
198. Control audit generation
199. Workflow audit generation
200. Broken-target detection
201. Missing-pointer-target detection
202. Duplicate-target detection
203. Ambiguous-target detection
204. Missing-route detection
205. Missing-section detection
206. Missing-control detection
207. Stale-content detection
208. Stale-route detection
209. Site-change detection
210. New-page detection
211. Removed-page detection
212. Changed-page detection
213. New-control detection
214. Removed-control detection

- 215. Changed-control detection
- 216. Changed-form detection
- 217. Changed-navigation detection
- 218. Changed-workflow detection
- 219. Pointer-map refresh
- 220. Site World refresh
- 221. Incremental rescan
- 222. Full-site rescan
- 223. Targeted-page rescan
- 224. Targeted-route rescan
- 225. Targeted-workflow rescan
- 226. Scan timestamping
- 227. Scan-version tracking
- 228. Scan provenance tracking
- 229. Scan confidence tracking
- 230. Scan-result validation
- 231. Scan-result deduplication
- 232. Scan-result normalization
- 233. Scan-result indexing
- 234. Scan-result persistence
- 235. Scan audit logging
- 236. Verified-site-state storage
- 237. Compiled-site-package generation
- 238. ORB deployment-data generation
- 239. ORB update-data generation
- 240. Website intelligence package generation
