

ORB WEAVER PRE-SALE READINESS CHECKLIST

No claim without proof. No sale without delivery capability.

Target: one complete, recorded URL-to-customer-ORB acceptance test

PAGE 1 - PRODUCT CAPABILITY AND BUILD PROOF

Done	Requirement	Pass condition	Proof
☐	Fresh customer project and scan	Correct account, project, domain, and crawl are created.	IDs, timestamps, scanned URLs
☐	Site World compiled	ORB answers from verified customer-site knowledge.	Site World artifact and response trace
☐	Pointer map with provenance	Map records project, domain, crawl, route, and target source.	Pointer map and quality report
☐	Verified pointer guidance	ORB visibly guides to a real, stable target.	Screen recording and runtime log
☐	Unsafe pointer blocking	Uncertain, duplicate, missing, or ambiguous targets never produce false guidance.	Negative and recovery tests
☐	Route and target-loss recovery	Guidance updates or stops safely after navigation or target loss.	Recorded recovery test
☐	Production voice path	Permission, listening, STT, site answer, TTS, and playback succeed.	End-to-end voice recording
☐	Voice failure handling	Permission, STT, or TTS failure is shown truthfully and recoverably.	Failure screenshots/logs
☐	Approved customer tool works	One real authorized tool action completes inside the customer ORB boundary.	Tool trace and recorded result
☐	Unauthorized tool is denied	A prohibited or unconfirmed action fails safely.	Negative test and audit entry
☐	No authority leakage	Customer package cannot access private Desktop, Spruked, or CALI tools.	Permission and isolation tests
☐	Customer data injected	Site World, pointer map, policy, tools, voice, and appearance enter the right package.	Manifest and package inspection
☐	Manufacturing verification passes	Atomic build, hashes, required files, and report all pass.	Verification report

Page 1 gate: The ORB must understand, speak, point, recover, and use approved tools before any feature claim is made.

ORB WEAVER PRE-SALE READINESS CHECKLIST

PAGE 2 - CUSTOMER DELIVERY, TRUTHFULNESS, AND SALE GATE

Done	Requirement	Pass condition	Proof
☐	Clean-machine installation	Package installs on the separate customer-test laptop without development repair.	Install recording and logs
☐	No dev-repo dependency	Delivered package runs without the Orb Weaver source tree.	Clean-machine runtime proof
☐	Restart and auto-start	Required services return healthy after reboot.	Reboot recording and health report
☐	Truthful Dock Station health	Backend, ORB, voice, pointer, and tool status come from live checks.	Health responses and failure test
☐	One canonical customer Vault	No parallel persistent data store is created.	Storage audit
☐	Customer/domain isolation	Wrong customers, domains, and origins cannot access the deployment.	Negative access tests
☐	Secrets excluded	Credentials, provider tokens, and development paths are absent from frontend and package.	Bundle and package scans
☐	Audit trail present	Sensitive tool actions and important owner changes are recorded.	Audit log
☐	Checkout/order binding	Customer, project, SKU, price, currency, and payment map to the correct order.	Order record and verification test
☐	Fulfillment authority enforced	Only verified payment or approved no-charge test can start fulfillment.	Automated or recorded test
☐	Failure never reports completion	Pointer, tool, build, install, or payment failure moves to Needs Review.	Failure-state evidence
☐	Backup and restore	Customer Vault can be backed up and restored without corruption.	Backup artifact and restore test
☐	Complete acceptance run	One uninterrupted URL-to-installed-ORB journey passes on a clean machine.	Final acceptance report

FINAL SALE GATE

- ☐ Full scan-to-ORB chain passes.
 ☐ Pointer works; unsafe targets block.
 ☐ Approved tool works; denied tool fails.
- ☐ Voice works through production path.
 ☐ Dock Station reports real state only.
 ☐ Clean install and restart pass.
- ☐ Isolation, secrets, Vault, authority pass.
 ☐ Order and fulfillment authority pass.
 ☐ Every public claim has recorded proof.

SALE APPROVAL: ☐ NOT READY ☐ READY FOR CONTROLLED CUSTOMER SALE
